Please Observe The Following

**NOTICE**

Please review the information in this manual prior to installing and operating the ionizer in a work environment.

**NOTICE**

Please keep this document in a convenient place to refer to as a guide.

**\*WARNING**

If the Staticmaster® model 6222 is used in a manner not specified in this manual, the protection provided by its design may be impaired.

**+\*WARNING**

This product is designed to be used by manufacturers for electronic industry applications and generates high voltage. Do not open and modify it, or operate without being completely assembled. High voltage internal parts can cause electrical shock.

**+\*WARNING**

Before performing maintenance, turn the Staticmaster® model 6222 off, disconnect from the power source, and do not wear a wrist strap. High voltage internal parts can cause electrical shock.

**\*WARNING**

Do not use this product in a flammable atmosphere.

**\*WARNING**

Do not submerge in water. If liquid enters product, disconnect power cord and allow to thoroughly dry before using again.

**\*WARNING**

If there is any damage on power cable or communication cable, replace these prior to use.

**\*WARNING**

This product will generate ozone along with ions, if the user smells ozone, please refresh the air in working environment.

## Description

Staticmaster<sup>®</sup> Model 6222 Overhead ionizer is designed to eliminate static. This system delivers a high volume of ionized air to neutralize static charge. The target's neutralization time will be optimal when placed 18" directly under the ionizing blower and will increase as the distance increases.

## Features

- Auto ion balance system, within 0±10V
- Tungsten alloy emitter point assembly
- Discharge needle assembly and front finger guard can be disassembled, it is convenient to do the cleaning, maintenance and emitter pin replacement
- Equipped with alarm indicator
- Rapidly neutralizes static charges
- Built-in Emitter Point Cleaner
- Optional Airflow indicator ribbon

## Installation:

1. Locate the fan:
  - 18" above the target to be neutralized for optimal performance, making sure that the airflow will not be restricted.
  - Near a working electrical outlet that is within reach of the 6 ft. detachable cord that is supplied with the ionizer.
2. The overhead ionizer is to be suspended securely by the attached lifting lugs.

## Maintenance:

Setting the automatic cleaning timer (fan operating hours)

1. Press the set button (shown on page 4)
2. Change the hundred's digit by pressing the increase or decrease button.
3. Press the set button again to move to the tenth digit. Repeat step 2
4. Press the set button again to move to the ones digit. Repeat step 2. Press set to go back the fan speed menu.

To turn off automatic cleaning by the setting timer to H000.

Locking out/Unlock the control panel

1. Press and hold both fan decrease and fan increase speed buttons for 5 seconds. This will toggle the control panel from lock (pass) or unlock (pass).

Manually cleaning the fan assembly: Use caution during this process because the emitter points are very sharp

1. Unplug the power cord from unit.
2. Push tab on top of front finger guard assembly.

3. Remove front finger guard.
4. Rotate emitter point assembly Counter clockwise 1/8

of a turn and remove assembly

5. Clean the emitter point assembly with a dust free cloth dipped in alcohol and anti-static brush
6. Clean internal fan parts with a dust free cloth dipped in alcohol and anti-static brush. Be careful of wire in as-

sembly. Wire

7. Place emitter point assembly with the word free at 11 o'clock and rotate clockwise 1/8 of a turn until assembly is secured.
8. Insert the bottom of front finger guard assembly first, ensure the safety latch is inserted correctly, then push gently on the top until the top tab snap into place.
9. Plug the power cord back in and place back into service.

## Dimensions:

## Technical Specifications:

Model: 6222

Input voltage: AC 110V/ 60 Htz or 220V/50 Htz

Technology: Corona

Ion Balance:  $0 \pm 10$  V

Decay Time: 2.4 Seconds,  $\pm 1000$ V to 100V, ANSI/ESD Association STM 3.1

Ozone generated ppm:  $\leq 0.004$ ppm (measured at 150 mm)

Applied environment temperature:  $32-104^{\circ}$ F

Applied environment humidity: 30%-70% Rh (no condensation)

Dimensions: 23.6in x 5.91 in x 6.30 in (600 mm x 150 mm x 160 mm)

Weight: 6.70 lbs (3.04 kg)

### Limited Warranty

NRD expressly warrants that for a period of one (1) year from the time of purchase, the ionizer will be free of defects in material (parts) and workmanship (labor). Within the warranty period, the Ionizer will be tested, repaired, or replaced at discretion of NRD, free of charge. Any ionizer under warranty should be shipped prepaid to the NRD factory. Call Customer Service at (716) 773-7634 for a Return Authorization number and shipping instructions. Include a copy of your original packing slip, invoice, or other proof of purchase date.

If the ionizer is out of warranty, NRD LLC will quote repair charges necessary to bring your ionizer up to factory standards.

### Warranty Exclusions

The forgoing express warranty is made in lieu of all other product warranties, expressed and implied, including merchantability and fitness for a particular purpose that is specifically disclaimed. The express warranty will not apply to defects or damage due to accidents, neglect, misuse, alterations, operator error, or failure to properly maintain, clean or repair products.

### Limit of Liability

The user shall determine the suitability of the product for their intended use, and the user assumes all risk and liability whatsoever in connection therein.

### Device disposal

The Staticmaster® model 6222 device should not be placed in household waste bins. Please check local regulations for information about the disposal of electronic products in your area.
